

## **APSI & Mike Minter Workforce Development Program approved for Broadband Training in Raleigh, NC**

*By APSI Public Relations*

*Dated: Jan 20, 2010*

*APSI & its Workforce Development Program recently received approval from the Workforce Development Board in Wake and Johnston County to offer its Broadband, Fiber Optic and Satellite Certification Courses.*

APSI & its Mike Minter Workforce Development Program will be offering high demand Broadband and Satellite Courses in the Raleigh, NC market. Early last week, Sr. Vice President Marvin Kelley was notified that APSI is now approved to offer its Broadband Fiber Optics and Broadband Satellite Courses to the unemployed, dislocated and military veterans who qualify for Workforce Investment Act (WIA) benefits in the Raleigh, NC market. "We are truly excited to be able to help the residents of Wake and Johnston County. We have received a lot of request from that area and it feels good knowing now we can help them with their continued education. This is a industry that is growing each and every day and our graduates can take advantage of the market upside and opportunities. We are working hard at adding programs to our catalog that lead to jobs and these two programs do that." said Mr. Marvin Kelley.

The Broadband Fiber Optics Program is a 80-hour course that includes 50% theory and 50% hands-on instruction. It is designed for individuals with no experience as well as those who have many years of experience in the technology field. Students who pass the examination for this course will receive two (2) globally recognized certification credentials and could qualify graduates for entry level jobs in the CATV, AV, Broadband, Fiber Optics, Voice/Data, Security, Premise Cabling and others.

The Broadband Satellite Program is a brand new 40-hour course designed for the individual who is interested in installing new satellite technology and equipment. The Broadband Satellite Course comes with one (1) globally recognized certification credential and could qualify graduates for entry level jobs with DirectTV, Dish Networks, Hughes Network and other companies in the the industry.

APSI is preparing to implement these two programs in the Wake and Johnston Counties as early as February 2010. Students interested in taking the classes can contact APSI or your local Employment Security Commission (ESC) for information on class dates and locations. APSI can be reached at 704-944-3528 or [info@apsicorp.com](mailto:info@apsicorp.com).
